

GOOGLE DRIVE & ACCESS MANAGEMENT GUIDE

Purpose

To maintain an organized shared-drive environment where team members can easily access the resources required for their roles while sensitive information remains restricted.

1. ORGANIZE BY FUNCTION

Store documents according to their department, project, or function.

Examples:

- Marketing
- Finance
- Projects
- Volunteer Resources
- General Organizational Resources

2. FILE DOCUMENTS IN THE CORRECT LOCATION

When a document is found outside its appropriate folder:

- ☐ Identify the document's purpose
- ☐ Determine the appropriate department or project folder
- ☐ Move the document to the correct location
- ☐ Ensure the file remains accessible to the appropriate team members

3. GRANT ROLE-BASED ACCESS

Access should be provided according to a person's role.

Team members should have access to the folders and resources required for their responsibilities.

4. RESTRICT SENSITIVE INFORMATION

Personal and confidential volunteer information should not be placed in publicly accessible folders.

Access should be limited to authorized personnel.

5. MAINTAIN CURRENT INFORMATION

Shared resources should be reviewed and updated when organizational information changes.

Examples include:

- Project information

- Organizational statistics
- Onboarding materials
- Department resources

6. REVIEW ACCESS WHEN ROLES CHANGE

When someone joins a department, changes roles, or leaves the organization:

- ☐ Confirm their current access
- ☐ Provide access required for their new responsibilities
- ☐ Remove or adjust access that is no longer appropriate

7. KEEP INFORMATION EASY TO FIND

A well-organized folder structure should make it easy for team members to locate the information they need without searching through unrelated folders.
